

The image shows a screenshot of an IDE with a dark theme. The top menu bar includes File, Edit, Selection, View, Go, Run, Terminal, and Help. The breadcrumb navigation shows 'demoproject'. The editor has three tabs: 'App.java', 'DateTimeServer.java' (active), and 'DateTimeClient.java'. The active tab shows the following Java code:

```
src > J DateTimeServer.java > DateTimeServer > main(String[])
5 public class DateTimeServer {
6     public static void main(String[] args) throws Exception {
7
8         ServerSocket server = new ServerSocket(port: 6000);
9
10        System.out.println(x: "Server started...");
11        System.out.println(x: "Waiting for client...");
12
13        Socket socket = server.accept();
14
15        PrintWriter out =
16            new PrintWriter(socket.getOutputStream(), autoFlush: true);
17
18        out.println(new Date());
19
20        System.out.println(x: "Date and time sent to client.");
21
22        socket.close();
23        server.close();
24    }
25 }
```

Below the editor, the 'Terminal' tab is active, showing the following commands and output:

```
C:\Users\vanda\OneDrive\Desktop\demoproject\src>javac DateTimeServer.java
Picked up JAVA_TOOL_OPTIONS: -Dstdout.encoding=UTF-8 -Dstderr.encoding=UTF-8

C:\Users\vanda\OneDrive\Desktop\demoproject\src>javac DateTimeClient.java
Picked up JAVA_TOOL_OPTIONS: -Dstdout.encoding=UTF-8 -Dstderr.encoding=UTF-8

C:\Users\vanda\OneDrive\Desktop\demoproject\src>java DateTimeServer
Picked up JAVA_TOOL_OPTIONS: -Dstdout.encoding=UTF-8 -Dstderr.encoding=UTF-8
Server started...
Waiting for client...
[]
```
