

The screenshot shows an IDE window with a dark theme. The top menu bar includes File, Edit, Selection, View, Go, Run, Terminal, and Help. The breadcrumb navigation shows 'demoproject'. The editor has three tabs: 'App.java', 'TCP_ChatServer.java' (active), and 'TCP_ChatClient.java'. The code in 'TCP_ChatServer.java' is as follows:

```
src > J TCP_ChatServer.java > TCP_ChatServer
1  import java.io.*;
2  import java.net.*;
3  import java.util.Scanner;
4
5  public class TCP_ChatServer {
6
7      Run | Debug
      public static void main(String[] args) throws Exception {
8
9          ServerSocket serverSocket = new ServerSocket(port: 7001);
10
11         System.out.println(x: "TCP Chat Server started...");
12         System.out.println(x: "Waiting for client...");
13
14         Socket socket = serverSocket.accept();
15
16         System.out.println(x: "Client connected!");
17         System.out.println(x: "Start chatting...");
18         System.out.println(x: "Type 'bye' to end the chat.");
19
20         BufferedReader in = new BufferedReader(
21             new InputStreamReader(socket.getInputStream()));
22     }
```

The bottom panel shows the 'Terminal' tab with the following output:

```
Problems Output Debug Console Terminal Ports Spell Checker
Picked up JAVA_TOOL_OPTIONS: -Dstdout.encoding=UTF-8 -Dstderr.encoding=UTF-8
C:\Users\vanda\OneDrive\Desktop\demoproject\src>java TCP_ChatServer
Picked up JAVA_TOOL_OPTIONS: -Dstdout.encoding=UTF-8 -Dstderr.encoding=UTF-8
TCP Chat Server started...
Waiting for client...
Client connected!
Start chatting...
```
