

The screenshot shows an IDE with a dark theme. The top menu bar includes File, Edit, Selection, View, Go, Run, Terminal, and Help. The breadcrumb navigation shows 'demoproject'. The editor has three tabs: 'App.java', 'TCP\_FileServer.java 1', and 'TCP\_FileClient.java 1', with 'sample.txt' visible in the background. The active file is 'TCP\_FileServer.java', showing the following code:

```
src > TCP_FileServer.java
1 > import java.io.*;...
3
4 public class TCP_FileServer {
5
6     Run | Debug
7     public static void main(String[] args) throws Exception {
8
9         ServerSocket serverSocket = new ServerSocket(port: 7003);
10
11         System.out.println(x: "TCP File Server started...");
12         System.out.println(x: "Waiting for client...");
13
14         Socket socket = serverSocket.accept();
15
16         System.out.println(x: "Client connected.");
17
18         DataInputStream in =
19             new DataInputStream(socket.getInputStream());
20
21         // Receive file name
22         String fileName = in.readUTF();
23         System.out.println("Receiving file: " + fileName);
```

Below the editor is a panel with tabs: Problems (7), Output, Debug Console, Terminal, Ports, and Spell Checker. The 'Terminal' tab is active, displaying the following output:

```
C:\Users\vanda\OneDrive\Desktop\demoproject\src>java TCP_FileServer
Picked up JAVA_TOOL_OPTIONS: -Dstdout.encoding=UTF-8 -Dstderr.encoding=UTF-8
TCP File Server started...
Waiting for client...
Client connected.
Receiving file: sample.txt
File received successfully.
Saved as: received_sample.txt

C:\Users\vanda\OneDrive\Desktop\demoproject\src>
```
